Charles B. Chrystal Co., Inc., founded in 1897, represents mining companies and mineral producers both in the United States and throughout the world. We offer a long list of non-metallic industrial minerals from many sources. Our activities include warehousing and distribution of minerals in major cities, importing, exporting, locating sources for special situations, and acting as a marketing agent for mineral companies. The list of our regular non-metallic minerals follows:

- Abrasives
- Alumina
- Attapulgite
- Bentonite
- Brucite
- Calcium Carbonate
- Calcium Sulfate
- Chalk: Precipitated
- Chemicals: Cosmetics
- Chemicals: Soap Makers
- Chemicals: Water Treatment
- Chrome Oxide
- Clay: China
- Clay: Powdered, Pulverized, Ground, Milled
- Cosmetic Ingredients
- Cosmetics: Custom
- Crayons: Metal Marking
- Dolomite
- Feldspar Flux
- Flint: Non Sparking
- Glass: Filler & Abrasive
- Gypsum
- High Purity Quartz
- Iron Oxide: Natural and Synthetic
- Kaolin
- Manganese Dioxide
- Mica
- Mica: Plate
- Mineral Beads
- Pebbles
- Plaster
- Powder: Talcum, Baby, Bath, Dusting, Face
- Pumice: All Grades & Types
- Olivine
- Quartz Grains and Flour
- Retardants: Fire & Flame
- Retarders for Wallboards and Stucco
- Rottenstone
- Salt
- Sand
- Silica
- Silk Fibers and Proteins
- Silk Ingredients For Cosmetics
- Slate Flour
- Soapstone
- Talc
- Terra Alba
- Tripoli

Most of the minerals we offer are available in multiple grades, qualities, packages, and sources. For example: qualities vary from industrial and technical to high purity and fit for human consumption. Packages vary from pails, paper bags, fiber drums, super sacks, to bulk. Grades can be lump, granular, powder, slurry, or micron sized. Many goods are sold with lot numbers traceable to the original production and meeting ISO 9000 standards and with Certificates of Analysis conforming to USP or Bacteria free.
